EDUCATION

University of Rochester, *Rochester NY*   August 2014 - May 2018

- Candidate for B.S. in Computer Science, specializing in algorithms & complexity
- Candidate for B.A. in Mathematics, specializing in abstract algebra
- Taken several graduate-level courses, such as:

  - CSC 284 – Advanced Algorithms
  - CSC 286 – Computational Complexity
  - MTH 436 – Group and Ring Theory
  - MTH 437 – Galois Theory

- Current Major GPA is 3.82 (Computer Science) and is 3.80 (Mathematics), achieved Dean's List each semester

SOFTWARE DEVELOPMENT EXPERIENCE

Computational Statistics Research Assistant   September 2016 - Present
University of Rochester Chemical Engineering Department   *Rochester, NY*

- Created and improved an algorithm which implements a Markov chain based statistic analysis on a set of random variables given by time series data, along with a friendly web interface for visualizing its results
- Front-end using JS/jQuery with Bootstrap, and back-end (simulated annealing method) using Python with Flask

Software Development Intern   June 2017 - August 2017
Edu Chat Inc.   *New York, NY*

- Developed an AI which used natural language processing to classify student questions on course material
- Worked closely with a team of four other engineers, using JIRA and Git extensively, to refine and integrate the new NLP question-matching model with the web platform for students and professors to use

LEADERSHIP EXPERIENCE

Teaching Assistant   January 2016 - Present
University of Rochester Department of Computer Science   *Rochester, NY*

- Led weekly workshops, graded tests / homework, and helped students through core and upper-level classes
- Relevant courses include CSC 254 Programming Language Design and CSC 282 Analysis of Efficient Algorithms

Student Supervisor   September 2014 - Present
University of Rochester Event and Classroom Management   *Rochester, NY*

- Trained, managed, and communicated with the large (80+) student staff since August 2016, in addition to:
- Organized small teams which ran AV technology for events across campus, including concerts and ceremonies, and also provided systems and software support for students & faculty at the University

SKILLS AND INVOLVEMENT

Programming

- Languages: Proficient with C, Java, Python, and JavaScript; and experience with C++, Scala, Swift, and SQL
- Non-Languages: Skilled with Agile development, Git source control, BASH terminal use, and LaTeX

Qualifications

- Founded a weekly study group which connected first-year CS students to work together on course projects
- ?????
